

LIFE FOR YOUR LIGHT

## FREE YOUR LIGHT. WE TAKE CARE OF THE REST.

Lighting fixtures and systems should be diverse, personal and unique.

Designing an advanced LED Lighting system from standard assemblies could limit your results.

Roal's Solid State Lighting technologies, custom electronics design and manufacturing capabilities, enable lighting manufacturers to practice their art and work without boundaries.

### **Free your light, drive your digital system.**

Roal: a wide range of Electronic and Control engineering, Led Board assembly (EMS) and complete LED power solutions. Our turn-key design and manufacturing services are based on our patented high-efficiency power converters, digital controllers, drivers and thermal packaging expertise.
